PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in software engineering and a proven ability to translate complex problems into practical, scalable solutions. Developed and deployed AI/ML, backend, and full-stack applications across recommendation systems, real-time platforms, and computer vision, alongside industry exposure to network security. Strong in problem-solving and system design, with a focus on engineering efficient, reliable, and production-ready software for real-world applications

TECHNICAL SKILLS

Languages: C++ (Data Structures & Algorithms, 200+ problems solved), Python, SQL

Web & Backend: React.js, FastAPI, HTML5, CSS3, Full Stack Development, Docker, WebSocket, Redis, CI/CD

AI & Machine Learning: Langchain, Multi-Agent Systems, YOLOv8, OpenCV, LightGBM, LSTM, BERT, TF-IDF, SVD

Soft Skills: Cross-functional Collaboration, Technical Communication, Product Thinking, Stakeholder Presentation

EXPERIENCE

Athreya Technologies Private Limited

Jan 2024 – May 2024

Network Security Engineer Intern(trainee) – Spoof Detection & Network Infrastructure

- Designed and implemented a full-stack spoof detection tool using Java Swing, centralizing packet visualization across monitored nodes and cutting false-positive alerts.
- Audited and validated 100% of network packet transmissions across communication endpoints using real-time monitoring tools, achieving zero data-integrity failures across a 5-month engagement.
- Key Skills:** Git, Java Swing, SQL, Cisco Packet Tracer, Network Security, TCP/IP

PROJECTS

CineSense - Movie Recommendation System

Python, FastAPI, TF-IDF, BERT, Scikit-Learn, SVD, React.js, Redis, PostgreSQL, Docker

Aug 2026

- Developed and deployed a hybrid machine learning recommendation engine combining TF-IDF and BERT-based semantic content filtering with SVD-based collaborative filtering, using cosine similarity to score content relevance through a RESTful API architecture.
- Engineered an end-to-end discovery pipeline with Levenshtein-based typo-tolerant spellcheck, multi-language query matching, and priority ranking, backed by Redis caching and an in-app conversational AI assistant.
- Implemented a bounded min-heap priority algorithm for efficient Top-N candidate retrieval, trained on a dataset augmented with synthetic samples, and deployed the full-stack application to production with a PostgreSQL persistence layer for personalized recommendations.

VisionAI — Automated visual inspection tool

Python, FastAPI, YOLOv8, React.js, OpenCV, Docker

Jun 2026 – Aug 2026

- Developed a real-time object detection pipeline for automated defect inspection, achieving 85%+ detection accuracy, and engineered an interactive 3D visualization tool using Three.js for precise defect localization.
- Built an automated retraining pipeline with data drift monitoring to maintain model accuracy over time, and implemented JWT-based authentication to secure system access.
- Containerized the full inference and training stack with Docker for reproducible deployment, and exposed detection results through a FastAPI backend consumed by a React.js dashboard for real-time inspection review.

Voyago — Full-Stack Mobility & Agentic AI Travel Concierge

Python, FastAPI, LangChain, React.js, PostgreSQL, WebSockets, Three.js, Docker

Aug 2025 – Dec 2025

- Designed and deployed a scalable backend using FastAPI supporting concurrent on-demand ride dispatch, scheduled outstation transit, and role-based JWT authentication across modular REST APIs.
- Developed an Agentic AI Travel Concierge using LangChain to autonomously coordinate multi-tool research workflows, synthesizing 2–14 day non-repeating itineraries linked to a 3D WebGL geospatial interface.
- Implemented WebSocket-based real-time state synchronization for low-latency driver-rider matching, and modeled relational schemas in PostgreSQL (Supabase) containerized with Docker.

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Internship – Cybersecurity, Athreya Technologies | Nutanix Cloud | AI – IBM

Generative AI: Completed 21 courses covering LLMs, prompt engineering, RAG, and fine-tuning; mentored peers through technical sessions.

EDUCATION

BMS College of Engineering

Bangalore, India

B.E. Computer Science with Business Systems

2024 – 2027

- CGPA: 7.8

KLE C. I. Munavalli

Hubballi, India

Diploma in Computer Science

2021 – 2024

- CGPA: 9.2

Chinmaya English Primary School

Class X

2021

- Percentage: 78%
